

Hands-on Activity

National Education Policy (NEP 2020) has laid a great emphasis on Experiential Learning, Arts Integration and Sports Integration. Engaging students by keeping one day exclusively for **Hands-on Activity** will make learning joyful, creative, interesting and impactful. 14th July, 2023, was the day kept for this experiential learning.

By planning this interesting activity on the BSS campus, we were able to inspire a high spirit and better learning among our students just like we did last year. Students face and positivity revealed a spirit of learning and glimmerings of joy. The chosen activities were enjoyed by the teachers and students alike, and everyone had a great time.

The collaboration and teamwork remained at their peak during the activity time. The students were seen engaged in a variety of activities such as stitching, painting, art and craft work and cooking, This day was highly productive in terms of students' engagement.

Here are pictures showing the involvement of students in hands-on activities:

Grade 5 helping in Cooking preparation

Grade 5 engaged in cooking activity the way it used be carried out during the Primitive Era

Grade 6 engaged in Embroidery Work
